

The China ASEAN rubber Matchmaking build complementary industrial chain

August 20, co-sponsored by the China – ASEAN Business Council, the Secretariat and the China Kunming People's Government of the Third China – ASEAN industry cooperation the Kunming meeting held in Kunming. More than 200 delegates of the government departments in charge of people in China and the ASEAN countries, the supplier (HS) will be leaders and famous entrepreneurs. Participants around the “China – ASEAN: build the the complementary industrial chain” theme of the meeting, to discuss strengthening trade cooperation, in order to promote the economic growth of China – ASEAN Free Trade Area countries. During the meeting, China – ASEAN the rubber industries docking at the venue from Thailand, the Philippines, Vietnam, Indonesia, five guests speak Association of Malaysia, national rubber industry and made a detailed presentation on the state of cooperation with China. Vice president of the Thai Chamber of Commerce and Industry Poplar music: Thailand is the largest exporter of natural rubber, natural rubber production in 2011 of 340 million tons, valued at \$ 14.5 billion, of which only 14 per cent of the country's rubber products, 86% for export. Rubber prices dropped from \$ 6,000 / ton in February 2011 to the current level of \$ 3,000 / ton, President Young expressed concern, but is still optimistic about the future price movements. Yang, president of the Thailand logistics costs would account for about 19%, much higher than the developed countries, logistics costs account for only 10% of the current situation, said the next five years, the Thai government will increase investment in the logistics industry and support. The major speech content of the Philippine Rubber Industry Association, honorary president of BASILISA: First introduced rubber planting area in the Philippines, from 110,000 hectares in 2007 to grow to 160,000 hectares in 2011 to maintain an annual growth rate of 9.85%. Currently, many small farmers in the Philippines, the average per-mu yield of rubber is not high, the Philippines in 2011 produced a total of 425,000 tons of rubber, of which 90% are exported, major exporting countries are Malaysia, China and South Korea. Secondly informed the opportunities and challenges facing the rubber plantations in the Philippines, stressed that the investment opportunities in the Philippines, and welcome entrepreneurs to the southern Philippines, Palawan eliminating the need to invest in planting rubber and construction of modern rubber processing plants. In order to let more people know about the investment situation in the Philippines, on September 18-19 this year, the Philippine government will be organized in the Philippines Pampanga rubber investment to meet the first session of the Philippine Fair. The secretary general of the Vietnam Rubber Association VO HOANG AN speech: China is currently the largest consumer of natural rubber in the world, is also an important natural rubber importing countries. The rapid development of China's rubber industry to promote the cultivation and production of natural rubber in the ASEAN countries. Natural rubber has been recognized as eco-friendly crops planted not only to countries and farmers brought opportunities, but also provides the raw materials to ensure the sustainable development of the rubber industry in China. The trade between China and Vietnam in recent years has been on an uptrend. China is the largest importer of Vietnamese natural

rubber, accounting for 60 percent of Vietnam's total rubber exports. China's natural rubber top four importing countries are Thailand, Indonesia, Malaysia and Vietnam. In 2011, Vietnam exported 816,000 tons of natural rubber exports to 500,000 tons (including composite rubber), natural rubber trade volume reached 1.9 billion U.S. dollars, accounting for 20% of China's natural rubber imports. Vietnam rubber products imported from China, including synthetic rubber, tires, conveyor belts and other rubber products totaled \$ 157 million in 2011. The Vietnamese government plans to natural rubber production reached 120 million tons in 2020, hoping to supply China with more rubber.

Vietnam Association expressed concerns about the volatility of the prices of natural rubber and downstream enterprises slowdown in demand for natural rubber for hope through effective and timely communication of information to ensure the stability of steady supply and price of natural rubber, rubber producers and consumers The common interests of its efforts. Final recommendations in – the more the two sides can strengthen the training and access to the plant, to convene international conferences, exhibitions, etc. to promote mutual business cooperation.

The Executive Director of the Indonesian Rubber Association TJIA ERWIN TUNAS speech: First, a review of the 2002 natural rubber prices to stimulate natural rubber plantations in the period 2005-2008 and refurbished planting. Details this period of Indonesia's natural rubber production, consumption and export data from 2007-2015 Indonesia's natural rubber acreage and refurbished planting plan and forecast from 2011 to 2015, if the natural rubber The annual growth rate of 7.1%, then to 2015, Indonesia's natural rubber production will reach 3.84 million tons. Secondly, for the period 2007-2011, as Indonesia's GDP has maintained a high growth rate (6.3%, 6.0%, 4.6%, 4.6% and 6.0%), domestic consumption of natural rubber is not affected too much the impact, but the world's developed economies, the economic downturn has affected the export of natural rubber, natural rubber from 2007 to 2010, the annual average export growth of only 0.6% in 2010, 2.35 million tons were exported rubber, hope from 2011 annual export growth in 2015 reached 6.4%, in order to achieve the export target of 3.2 million tons in 2015. Finally introduced varieties and specifications of Indonesia's natural rubber exports, the main exporting countries and the export volume, and cited the exports of rubber products from 2007-2010. Indonesia concluded that the world's demand for natural rubber is expected to rapidly rise, the Indonesian government is ready to prepare, to enhance production and increase Indonesia's domestic production of high value-added rubber products, and hope that the country's natural rubber consumption reached their 50% of production, in order to achieve this goal, the Indonesian government also called on countries to Indonesia to invest and build factories, the production of tires, automotive rubber products, conveyor belts, hose and other rubber products.

Malaysian Rubber Export Promotion Council Chief Representative speech: Beginning in 2006, China has become Malaysia's largest natural rubber and rubber products importing countries. Only the period from 2005 to 2006, China's natural rubber imports from Malaysia and products increased by 2-fold to 7.69 billion ringgit, while the period from 2006 to 2011 is increased by three times to reach 21.77 billion ringgit . Trade cooperation between horse and still maintained a double-digit growth,

Malaysia hopes to strengthen cooperation with China in the final rubber products, and detailed analysis of the competitiveness of some of the major Malaysian rubber products in China and its recognized level. Malaysian side each other to provide the necessary information to communicate mutual cooperation in the future to provide greater assistance, and convinced that the future of bilateral trade will continue to expand. In 2011, China's imports from Malaysia, the top three rubber products were plastic wire, gloves and condoms, worth up to 800 million ringgit. Finally, he also suggested that China can take advantage of Malaysian exports to Japan, South Korea and India to avoid some of the tariff, Malaysia and the three countries signed a free trade agreement, the zero tariff preferential policies. After extensive exchanges and discussions, we agreed that China and ASEAN countries exist in close cooperation on the basis of this meeting will become a new starting point for cooperation between China and the ASEAN countries, the rubber industry. As an important importer of natural rubber and rubber products manufacturing country, China will strengthen cooperation with ASEAN countries to expand investment and cooperation in the field of rubber and make due contribution to stabilize rubber prices. But at the same time, the China Rubber Industry Association on behalf of rubber production enterprises strongly called on ASEAN countries to reduce high tariffs on imports of Chinese rubber products, in order to promote genuine free trade.
