

Japan rubber stocks fall from 6-yr high, first fall in 3 months

April 22 (Reuters) – Crude rubber inventories at Japanese ports fell in the 10 days to April 10 to 15,668 tonnes after peaking at a six-year high in the previous 10-day period, marking the first fall in three months, data from the Rubber Trade Association of Japan showed. Inventories last declined in the first 10 days to Jan. 10 this year, during which inventories fell 202 tonnes to 6,934 tonnes.
