

2013 annual report of natural rubber futures: maintain fluctuated

China, the U.S. economy is now showing signs of improvement, the euro, the rebound in the stock market shows that market confidence is restored in the short to medium term, or continue to the macroeconomic environment of 2013 compared to 2012, or have improved, commodity market in the first quarter, or to maintain a strong shock, because the seasonal lead stage supply shock rise in the yen's sharp depreciation or rubber prices continue to lead.

Digestion of a variety of bullish factors, starting from the late second quarter, the European debt crisis, U.S. debt negotiations are likely to again as the world economy cast a shadow, natural rubber Latex season also started to enter the contradiction of supply exceeding demand will become more prominent, car The market's explosive growth miracle or difficult to replicate, Hujiao prices may come down again, the price of synthetic rubber and natural rubber spreads repair will drag on rubber prices.

2013 Hujiao will remain fluctuated, and is expected to run throughout the year range 20000-30000.
