

Kumho Recalls 1,200 Tires in U.S.

Kumho Tire USA Inc. is voluntarily recalling 1,238 of its Kumho Solus KH25 passenger tires due to concerns about sidewall cracking. The tiremaker said the tires in question are size 225/45R17, and were produced during August 2011 through June 2012 (DOT Range: 3411 through 2512). Kumho said that of those tires being recalled, 122 tires were sold to consumers.
